

Questions	Answers
<b>Date Today:</b>	01/08/05
<b>Company / Organization Name:</b>	Skunk-A-Rific! Computers
<b>Type of Business:</b>	Computer Sales and Service
<b>Address / Based in (Town/City):</b>	Fairfield, Ohio, USA
<b>No. of Employees:</b>	13
<b>Year Established:</b>	1997
<b>Your Web Site:</b>	<a href="http://www.skunkarific.com">www.skunkarific.com</a>
<b>Contact Name:</b>	William Lee
<b>Contact Email Address:</b>	<a href="mailto:Sales@skunkarific.com">Sales@skunkarific.com</a>
<b>Your Operating System(s):</b>	Windows XP Professional, Suse Linux, Slackware Linux
<b>Version of OOo you migrated to:</b>	1.1.4
<b>Previous Office Suite (if any):</b>	None for this install
<b>Where did you hear about OpenOffice.org?</b>	Linux User Group
<b>Reason for Migrating to OpenOffice.org:</b>	Lack of nuisance from Microsoft, i.e. Validation, sliding menus, the Office Assistant Paper Clip that cheerfully offers to help me write suicide notes when I mention I've had a bad day.
<b>How easy did you (or your users) find it to migrate?</b>	The users simply were told to use the stack of coins for currency values instead of the dollar sign, and to make PDF attachments.  It went without incident
<b>Do you use any other Office Suite/Application and why?</b>	We use 602 suite for labels. Open Office really needs work here! Something like the Avery plug-in for the suite would be sweet.
<b>Do you have any "wishes" for OpenOffice.org?</b>	See above, and something like Publisher would be REALLY cool. And fix everything I hate below!
<b>What features in OpenOffice.org do you like?</b>	It is 'quiet'. There are no annoyances. By the way, our Microsoft supplier "Gold" reseller, uses OOo to mail Microsoft reports in the OpenOffice Spreadsheet format. Microsoft acts like they put their pantyliner on upside down when they get those .sxc files
<b>What do you dislike about OOo?</b>	The label thing, and some customers freak with they don't see the magic "W". Also, it would be REALLY helpful when mapping files to have a separate exe or EASY switch that would load the appropriate program, ever try to map a custom keyboard without going to properties and finding out how to map the keys? WHAT A PAIN! Also, documentation is NIL with OOo. Customers CONSTANTLY ask me about this and I can supply nothing. I don't know how to use Impress, and I got a PowerPoint for dummies book, and the controls are different, and I have to sort out whether they are in different places or just not there. Seeing as I have no MS PowerPoint experience, this job is difficult.
<b>Anything else you'd like to say...</b>	I like your site!
